Subject: Microsoft Settlement

The current Microsoft settlement is simply a bad idea and is against the interest of the citizens of this nation and opposed to the very core national interests and laws.

Please do not forget the individuals in making this settlement. While big business deserves to be protected from the unlawful practices of Microsoft so to do the individual non-profit opensource developers of whom this settlement does not protect.

Please do your part in defense of the United States in upholding and enforcing the laws of this nation to provide a fair and just free market.
